Did we hear from Mariani re: the letter to the PRPs?

Barbara, I noticed in the weekly you plan to have PRP search updata by 2010/4. While the ROD is planned in wastelan for 2011, Sam continues to push for it in 2010 so you may want to do your PRP update by no later than Q2. Remedial may not get the ROD done, but let's not be the reason for any delays in the process. This is one to keep your eye on and to stay in close communication with the RPM. We don't have all the details worked out, but DOJ should send a letter to the PRPs today or tomorrow that will set us on the right path. We need the PRPs to remove tanks and repair the cap under an AOC for removal. Once completed, we might be able to do a no further action ROD. The PRPs have been hot and cold on doing the removal under an AOC, but currently they seem interested. I spoke to Gary Miller this week. Thanks
